

## Assignment01-Day 01

### 01: Creation of S3 Bucket

### 02: Uploaded an object(file)

## 03: Object details page

The screenshot shows the AWS S3 Management Console interface. The left sidebar contains navigation links for Buckets, Access Points, Object Lambda Access Points, Batch Operations, Access analyzer for S3, Storage Lens, Dashboards, AWS Organizations settings, and Feature spotlight. The main content area displays the 'Object details' page for the object 'WhatsApp Image 2021-03-12 at 10.34.49 AM (1).jpeg' in the 'ridhvnsh-bucket'. The 'Object overview' section shows the following details:

- Owner: AWS Region, US East (Ohio) us-east-2
- Last modified: March 19, 2021, 15:55:20 (UTC+05:30)
- Size: 108.6 KB
- Type: jpeg
- Key: Key
- S3 URI: s3://ridhvnsh-bucket/WhatsApp Image 2021-03-12 at 10.34.49 AM (1).jpeg
- Amazon Resource Name (ARN): arn:aws:s3:::ridhvnsh-bucket/WhatsApp Image 2021-03-12 at 10.34.49 AM (1).jpeg
- Entity tag (Etag): 695a2d31235b82ca53b93ac316828553
- Object URL: https://ridhvnsh-bucket.s3.us-east-2.amazonaws.com/WhatsApp Image 2021-03-12 at 10.34.49 AM (1).jpeg

The bottom of the screen shows the Windows taskbar with the search bar and several application icons.

## 04: Edit Public Access Settings

The screenshot shows the AWS S3 Management Console interface. The left sidebar contains navigation links for Buckets, Access Points, Object Lambda Access Points, Batch Operations, Access analyzer for S3, Storage Lens, Dashboards, AWS Organizations settings, and Feature spotlight. The main content area displays the 'Edit Block public access (bucket settings)' page for the bucket 'ridhvnsh-bucket'. The 'Block public access (bucket settings)' section explains that public access is granted to buckets and objects through access control lists (ACLs), bucket policies, access point policies, or all. In order to ensure that public access to all your S3 buckets and objects is blocked, turn on Block all public access. These settings apply only to this bucket and its access points. AWS recommends that you turn on Block all public access, but before applying any of these settings, ensure that your applications will work correctly without public access. If you require some level of public access to your buckets or objects within, you can customize the individual settings below to suit your specific storage use cases. [Learn more](#)

The settings are as follows:

- ☐ **Block all public access**  
Turning this setting on is the same as turning on all four settings below. Each of the following settings are independent of one another.
- ☐ **Block public access to buckets and objects granted through new access control lists (ACLs)**  
S3 will block public access permissions applied to newly added buckets or objects, and prevent the creation of new public access ACLs for existing buckets and objects. This setting doesn't change any existing permissions that allow public access to S3 resources using ACLs.
- ☐ **Block public access to buckets and objects granted through any access control lists (ACLs)**  
S3 will ignore all ACLs that grant public access to buckets and objects.
- ☐ **Block public access to buckets and objects granted through new public bucket or access point policies**  
S3 will block new bucket and access point policies that grant public access to buckets and objects. This setting doesn't change any existing policies that allow public access to buckets and objects.

The bottom of the screen shows the Windows taskbar with the search bar and several application icons.

## 05: Making object Public

The screenshot shows the AWS S3 Management Console interface. The browser address bar displays the URL: `s3.console.aws.amazon.com/s3/buckets/ridhvns-bucket/object/edit_public_read_access?region=us-east-2&showversions=false`. The console header includes the AWS logo, 'Services' dropdown, a search bar, and user information 'RidhvanshK'. The breadcrumb trail is 'Amazon S3 > ridhvns-bucket > Make public'. The main heading is 'Make public'. Below it, a warning message states: 'When public read access is enabled and not blocked by Block Public Access settings, anyone in the world can access the specified objects.' The 'Specified objects' section contains a search bar with the placeholder 'Find objects by name' and a table with one object:

Name	Type	Last modified	Size
WhatsApp Image 2021-03-12 at 10.34.49 AM (1).jpeg	jpeg	March 19, 2021, 15:55:20 (UTC+05:30)	108.6 KB

At the bottom of the table are 'Cancel' and 'Make public' buttons. The Windows taskbar at the bottom shows the time as 4:01 PM on 3/19/2021.

## 06: Accessing object using URL

The screenshot shows a web browser window with the address bar displaying the URL: `ridhvns-bucket.s3.us-east-2.amazonaws.com/WhatsApp+Image+2021-03-12+at+10.34.49+AM+(1).jpeg`. The browser tabs include 'S3 Management Console' and 'WhatsApp+Image+2021-03-12+'. The main content area displays a photograph of a balcony with a metal railing, a green net, and a potted plant. The Windows taskbar at the bottom shows the time as 4:02 PM on 3/19/2021.
